Thin Solid Films 292 (1997) 335–339

thin solid films

Subject Index of Volume 292

Activation energy
experimental and theoretical study of step coverage in metal-organic chemical vapor deposition of tantalum oxide thin films, 324
Adsorption
kinetics of lysozyme adsorption at the air–buffer interface, 169
Alloy
oxidation study of a polycrystalline Ni/Cr alloy IV. 400 °C anneal in air, 236
Aluminium
transmission electron microscopy of Al–Cu interconnects during in-situ electromigration testing, 103
incorporation and mobility of zinc ions in anodic alumina films, 150
Aluminium nitride
an integrated optical method for measuring the thickness and refractive index of birefringent thin films, 255
Aluminium oxide
Al_3O_3 thin film growth on Si(100) using binary reaction sequence chemistry, 135
Amorphous materials
TEM study of silicide islands formation in reactions of thin films of metallic glasses with Si substrates, 307
Anodic oxidation
incorporation and mobility of zinc ions in anodic alumina films, 150
Atomic force microscopy
surface modification of MgO substrates from aqueous exposure: an atomic force microscopy study, 96
Al_3O_3 thin film growth on Si(100) using binary reaction sequence chemistry, 135
Auger electron spectroscopy
SnO_2 thin films prepared by the sol–gel process, 299

Biomaterials
bioactive nanostructure with glutamate dehydrogenase associated with LB films: protecting role of the enzyme molecules on the structural lipidic organization, 282
Bismuth
bismuth film coalescence determined by ellipsometry, 26

Cadmium telluride
improvement of the crystallinity of CdTe epitaxial film grown on Si substrates by molecular beam epitaxy using the two-step growth method, 232
effect of growth temperature on the orientation of CdTe on GaAs prepared by molecular beam epitaxy, 303
Carbon
study of nitrogen pressure effect on the laser-deposited amorphous carbon films, 318
Carrier gas
experimental and theoretical study of step coverage in metal-organic chemical vapor deposition of tantalum oxide thin films, 324

Catalysis
photoelectrocatalytic hydrogen production from water on transparent thin film titania of different crystal structures and quantum efficiency characteristics, 130
Chalcogenides
the effect of annealing on the optical absorption and electrical conduction of amorphous $As_{24.5}Te_{71}Cd_{4.5}$ thin films, 7
Chemical analysis
new method of microphase and chemical analysis as applied to the YBaCuO thin films, 85
Chemical vapour deposition
Al_3O_3 thin film growth on Si(100) using binary reaction sequence chemistry, 135
morphology and physical properties of SnO_2-based thin films deposited by the pyrosol process from dibutyltindiacetate, 145
strain and misfit dislocation density in finite lateral size $Si_{1-x}Ge_x$ films grown by selective epitaxy, 213
zirconia coatings realized by microwave plasma-enhanced chemical vapor deposition, 241
Chemical vapour deposition (CVD)
highly perfect thin films of SiC: X-ray double crystal diffractometry and X-ray double crystal topographic study, 1
a comparative study on the properties of TiN films prepared by chemical vapor deposition enhanced by r.f. plasma and by electron cyclotron resonance plasma, 124
high-resolution transmission electron microscopy study of pulsed laser beam crystallized Si thin film: the formation of hexagonal Si and defects, 313
Chemical vapour disposition
low loss laminated polarization splitters for wavelengths longer than 1.3 μm prepared by plasma enhanced chemical vapor deposition, 179
Chromium
oxidation study of a polycrystalline Ni/Cr alloy IV. 400 °C anneal in air, 236
Coatings
shakedown limits on coated surfaces, 156
Cobalt
silicide formation in cobalt/amorphous silicon, amorphous Co–Si and bias-induced Co–Si films, 31
microstructure of Co–Ni/Au multilayers studied by XRD, 61
Computer simulation
numerical simulation of scattering of the molecules of yttrium tris(dipivaloymethane) ($Y(C_{11}H_{19}O_2)_3$) in the potential field of crystal MgO and the formation of a near-surface layer, 43
stresses in strained GeSi stripes and quantum structures: calculation using the finite element method and determination using micro-Raman and other measurements, 218
Contacts
the importance of the Pd to Sn ratio and of annealing cycles on the performance of Pd/Sn ohmic contacts to n-GaAs, 264

Elsevier Science S.A.

Copper
transmission electron microscopy of Al–Cu interconnects during in-situ electromigration testing, 103
Crystallization
silicide formation in cobalt/amorphous silicon, amorphous Co–Si and bias-induced Co–Si films, 31
Crystal structure
effects of solvent on the morphology and crystalline structure of lithium phthalocyanine thin films and powders, 192

Deposition process
deposition process study of chromium oxide thin films obtained by d.c. magnetron sputtering, 75
vacuum-deposited films of liquid crystal molecules of cyanooctyloxy-biphenyl Electronic spectra of the films and structural transformation of the deposited films as revealed by in situ fluorescence measurements, 204
Diamond
optical and electrical properties of metal–diamond-like atomic-scale composite (DLASC) films and DLASC/Si heterostructures, 91
Diffusion
electrochemical redox behavior of nickel–iron cyanide film deposited onto indium tin oxide substrate, 227
Diodes
electrical properties of doped polypyrrole/silicon heterojunction diodes and their response to NO_x gas, 293
Dynamic ion mixing
determination of Young's modulus by a resonant technique applied to two dynamically ion mixed thin films, 55

Elastic properties
shakedown limits on coated surfaces, 156
Electrical properties and measurements
investigations on polycrystalline $CuGaTe_2$ thin films, 14
properties of WS_2 thin films obtained by solid-state reaction, induced by annealing, between W and S constituents sequentially deposited in thin film form. Influence of the annealing time., 69
optical and electrical properties of metal–diamond-like atomic-scale composite (DLASC) films and DLASC/Si heterostructures, 91
thermionic emission obtained by thermal annealing in vertical polysilicon–monosilicon junctions, 260
characteristics of Ni/n-$AgInSe_2$ polycrystalline thin film Schottky barrier diodes, 290
Electrochemistry
photoelectrocatalytic hydrogen production from water on transparent thin film titania of different crystal structures and quantum efficiency characteristics, 130
electrochemical redox behavior of nickel–iron cyanide film deposited onto indium tin oxide substrate, 227
Electromigration
transmission electron microscopy of Al–Cu interconnects during in-situ electromigration testing, 103
Electronic devices
characteristics of Ni/n-$AgInSe_2$ polycrystalline thin film Schottky barrier diodes, 290
Ellipsometry
bismuth film coalescence determined by ellipsometry, 26
Al_3O_3 thin film growth on Si(100) using binary reaction sequence chemistry, 135
Enzyme association
bioactive nanostructure with glutamate dehydrogenase associated with LB films: protecting role of the enzyme molecules on the structural lipidic organization, 282
Epitaxy
highly perfect thin films of SiC: X-ray double crystal diffractometry and X-ray double crystal topographic study, 1
strain and misfit dislocation density in finite lateral size $Si_{1-x}Ge_x$ films grown by selective epitaxy, 213
Evaporation
bismuth film coalescence determined by ellipsometry, 26

Fluorescence
vacuum-deposited films of liquid crystal molecules of cyanooctyloxy-biphenyl Electronic spectra of the films and structural transformation of the deposited films as revealed by in situ fluorescence measurements, 204
Fourier transform infrared spectroscopy
bioactive nanostructure with glutamate dehydrogenase associated with LB films: protecting role of the enzyme molecules on the structural lipidic organization, 282
Fourier transform IR spectroscopy
real-time in situ observation of photo-induced vapor deposition polymerization of *N*-vinylcarbazole with Fourier transform IR reflection absorption spectroscopy, 164

Gallium arsenide
the importance of the Pd to Sn ratio and of annealing cycles on the performance of Pd/Sn ohmic contacts to n-GaAs, 264
effect of growth temperature on the orientation of CdTe on GaAs prepared by molecular beam epitaxy, 303
Germanium
strain and misfit dislocation density in finite lateral size $Si_{1-x}Ge_x$ films grown by selective epitaxy, 213
stresses in strained GeSi stripes and quantum structures: calculation using the finite element method and determination using micro-Raman and other measurements, 218
Glasses
the effect of annealing on the optical absorption and electrical conduction of amorphous $As_{24.5}Te_{71}Cd_{4.5}$ thin films, 7
Glow discharge
effect of process parameters on glow discharge and film thickness uniformity in facing target sputtering, 20
Grain boundary
properties of WS_2 thin films obtained by solid-state reaction, induced by annealing, between W and S constituents sequentially deposited in thin film form. Influence of the annealing time., 69
Growth mechanism
bismuth film coalescence determined by ellipsometry, 26
grain sizes of Ni films measured by STM and X-ray methods, 184

Heterostructures
optical and electrical properties of metal–diamond-like atomic-scale composite (DLASC) films and DLASC/Si heterostructures, 91
thermionic emission obtained by thermal annealing in vertical polysilicon–monosilicon junctions, 260

Indium oxide
reactive thermal deposition of indium oxide and tin-doped indium oxide thin films on InP substrates, 50
Indium phosphide
reactive thermal deposition of indium oxide and tin-doped indium oxide thin films on InP substrates, 50
Interfaces
quantitative analysis of electron microscopic micrographs of multilayers, 118
kinetics of lysozyme adsorption at the air–buffer interface, 169
Ionised cluster beam deposition
fabrication of crystalline thin dye films using an ionized-cluster-beam deposition method, 40
Iron
electrochemical redox behavior of nickel–iron cyanide film deposited onto indium tin oxide substrate, 227

Iron oxide
investigation of the stoichiometry of MBE-grown Fe_3O_4 layers by magneto-optical Kerr spectroscopy, 270

Langmuir-Blodgett films
displacement current measurements of the dynamic charge transfer of photosynthetic reaction centers in monolayer LB films, 189
bioactive nanostructure with glutamate dehydrogenase associated with LB films: protecting role of the enzyme molecules on the structural lipidic organization, 282
Laser ablation
study of nitrogen pressure effect on the laser-deposited amorphous carbon films, 318
Laser irradiation
high-resolution transmission electron microscopy study of pulsed laser beam crystallized Si thin film: the formation of hexagonal Si and defects, 313
Lattice parameters
on the enlargement of the lattice parameter *c* in sputter deposited in situ prepared thin films of $YBa_2Cu_3O_x$, 277

Magnesium oxide
numerical simulation of scattering of the molecules of yttrium tris(dipivaloymethane) ($Y(C_{11}H_{19}O_2)_3$) in the potential field of crystal MgO and the formation of a near-surface layer, 43
surface modification of MgO substrates from aqueous exposure: an atomic force microscopy study, 96
Magnetic properties and measurements
investigation of the stoichiometry of MBE-grown Fe_3O_4 layers by magneto-optical Kerr spectroscopy, 270
Metallization
a comparative study on the properties of TiN films prepared by chemical vapor deposition enhanced by r.f. plasma and by electron cyclotron resonance plasma, 124
the importance of the Pd to Sn ratio and of annealing cycles on the performance of Pd/Sn ohmic contacts to n-GaAs, 264
Metal organic chemical vapor deposition
experimental and theoretical study of step coverage in metal-organic chemical vapor deposition of tantalum oxide thin films, 324
Metals
optical and electrical properties of metal–diamond-like atomic-scale composite (DLASC) films and DLASC/Si heterostructures, 91
Microphase analysis
new method of microphase and chemical analysis as applied to the YBaCuO thin films, 85
Molecular beam epitaxy
improvement of the crystallinity of CdTe epitaxial film grown on Si substrates by molecular beam epitaxy using the two-step growth method, 232
investigation of the stoichiometry of MBE-grown Fe_3O_4 layers by magneto-optical Kerr spectroscopy, 270
Molecular beam epitaxy (MBE)
effect of growth temperature on the orientation of CdTe on GaAs prepared by molecular beam epitaxy, 303
Monolayers
displacement current measurements of the dynamic charge transfer of photosynthetic reaction centers in monolayer LB films, 189
Morphology
effects of solvent on the morphology and crystalline structure of lithium phthalocyanine thin films and powders, 192
Multilayers
microstructure of Co–Ni/Au multilayers studied by XRD, 61
quantitative analysis of electron microscopic micrographs of multilayers, 118
low loss laminated polarization splitters for wavelengths longer than 1.3 μm prepared by plasma enhanced chemical vapor deposition, 179

Nanostructures
atomic force microscopy study of diamond-like atomic-scale composite films, 173
bioactive nanostructure with glutamate dehydrogenase associated with LB films: protecting role of the enzyme molecules on the structural lipidic organization, 282
Nickel
microstructure of Co–Ni/Au multilayers studied by XRD, 61
grain sizes of Ni films measured by STM and X-ray methods, 184
electrochemical redox behavior of nickel–iron cyanide film deposited onto indium tin oxide substrate, 227
oxidation study of a polycrystalline Ni/Cr alloy IV. 400 °C anneal in air, 236
Nitrogen
study of nitrogen pressure effect on the laser-deposited amorphous carbon films, 318
Nitrogen dioxide
electrical properties of doped polypyrrole/silicon heterojunction diodes and their response to NO_x gas, 293

Optical coatings
an integrated optical method for measuring the thickness and refractive index of birefringent thin films, 255
Optical constants
the effect of annealing on the optical absorption and electrical conduction of amorphous $As_{24.5}Te_{71}Cd_{4.5}$ thin films, 7
Optical properties
investigations on polycrystalline $CuGaTe_2$ thin films, 14
optical and electrical properties of metal–diamond-like atomic-scale composite (DLASC) films and DLASC/Si heterostructures, 91
low loss laminated polarization splitters for wavelengths longer than 1.3 μm prepared by plasma enhanced chemical vapor deposition, 179
an integrated optical method for measuring the thickness and refractive index of birefringent thin films, 255
Organic functional thin film
fabrication of crystalline thin dye films using an ionized-cluster-beam deposition method, 40
Organic substances
numerical simulation of scattering of the molecules of yttrium tris(dipivaloymethane) ($Y(C_{11}H_{19}O_2)_3$) in the potential field of crystal MgO and the formation of a near-surface layer, 43
Organometallic compounds
morphology and physical properties of SnO_2-based thin films deposited by the pyrosol process from dibutyltindiacetate, 145
Orientation
real-time in situ observation of photo-induced vapor deposition polymerization of *N*-vinylcarbazole with Fourier transform IR reflection absorption spectroscopy, 164
effect of growth temperature on the orientation of CdTe on GaAs prepared by molecular beam epitaxy, 303
Oxidation
oxidation study of a polycrystalline Ni/Cr alloy IV. 400 °C anneal in air, 236
Oxides
deposition process study of chromium oxide thin films obtained by d.c. magnetron sputtering, 75

Palladium
the importance of the Pd to Sn ratio and of annealing cycles on the performance of Pd/Sn ohmic contacts to n-GaAs, 264
Phase transitions
silicide formation in cobalt/amorphous silicon, amorphous Co–Si and bias-induced Co–Si films, 31
TEM study of silicide islands formation in reactions of thin films of metallic glasses with Si substrates, 307

Photochemistry
photoelectrocatalytic hydrogen production from water on transparent thin film titania of different crystal structures and quantum efficiency characteristics, 130
Phthalocyanines
effects of solvent on the morphology and crystalline structure of lithium phthalocyanine thin films and powders, 192
Physical vapour deposition
deposition process study of chromium oxide thin films obtained by d.c. magnetron sputtering, 75
real-time in situ observation of photo-induced vapor deposition polymerization of *N*-vinylcarbazole with Fourier transform IR reflection absorption spectroscopy, 164
Plasma processing and deposition
a comparative study on the properties of TiN films prepared by chemical vapor deposition enhanced by r.f. plasma and by electron cyclotron resonance plasma, 124
zirconia coatings realized by microwave plasma-enhanced chemical vapor deposition, 241
Polymers
real-time in situ observation of photo-induced vapor deposition polymerization of *N*-vinylcarbazole with Fourier transform IR reflection absorption spectroscopy, 164
kinetics of lysozyme adsorption at the air–buffer interface, 169
electrical properties of doped polypyrrole/silicon heterojunction diodes and their response to NO_x gas, 293
Pyrolysis
morphology and physical properties of SnO_2-based thin films deposited by the pyrosol process from dibutyltindiacetate, 145

Quantum effects
stresses in strained GeSi stripes and quantum structures: calculation using the finite element method and determination using micro-Raman and other measurements, 218

Resonant technique
determination of Young's modulus by a resonant technique applied to two dynamically ion mixed thin films, 55
Rutherford backscattering spectroscopy
strain and misfit dislocation density in finite lateral size $Si_{1-x}Ge_x$ films grown by selective epitaxy, 213

Scanning force microscopy
atomic force microscopy study of diamond-like atomic-scale composite films, 173
Scanning tunneling microscopy
grain sizes of Ni films measured by STM and X-ray methods, 184
Schottky barrier
characteristics of Ni/n-$AgInSe_2$ polycrystalline thin film Schottky barrier diodes, 290
Secondary electron microscopy
SnO_2 thin films prepared by the sol–gel process, 299
Semiconductors
the effect of annealing on the optical absorption and electrical conduction of amorphous $As_{24.5}Te_{71}Cd_{4.5}$ thin films, 7
characteristics of Ni/n-$AgInSe_2$ polycrystalline thin film Schottky barrier diodes, 290
Sensors
electrical properties of doped polypyrrole/silicon heterojunction diodes and their response to NO_x gas, 293
SnO_2 thin films prepared by the sol–gel process, 299
Silicides
silicide formation in cobalt/amorphous silicon, amorphous Co–Si and bias-induced Co–Si films, 31
TEM study of silicide islands formation in reactions of thin films of metallic glasses with Si substrates, 307
Silicon
stresses in strained GeSi stripes and quantum structures: calculation using the finite element method and determination using micro-Raman and other measurements, 218
improvement of the crystallinity of CdTe epitaxial film grown on Si substrates by molecular beam epitaxy using the two-step growth method, 232
in situ tensile strength measurement and Weibull analysis of thick film and thin film micromachined polysilicon structures, 247
thermionic emission obtained by thermal annealing in vertical polysilicon–monosilicon junctions, 260
TEM study of silicide islands formation in reactions of thin films of metallic glasses with Si substrates, 307
high-resolution transmission electron microscopy study of pulsed laser beam crystallized Si thin film: the formation of hexagonal Si and defects, 313
Silicon carbide
highly perfect thin films of SiC: X-ray double crystal diffractometry and X-ray double crystal topographic study, 1
low loss laminated polarization splitters for wavelengths longer than 1.3 μm prepared by plasma enhanced chemical vapor deposition, 179
Solvent
effects of solvent on the morphology and crystalline structure of lithium phthalocyanine thin films and powders, 192
Sputtering
effect of process parameters on glow discharge and film thickness uniformity in facing target sputtering, 20
deposition process study of chromium oxide thin films obtained by d.c. magnetron sputtering, 75
on the enlargement of the lattice parameter *c* in sputter deposited in situ prepared thin films of $YBa_2Cu_3O_x$, 277
Step coverage
experimental and theoretical study of step coverage in metal-organic chemical vapor deposition of tantalum oxide thin films, 324
Sticking coefficient
experimental and theoretical study of step coverage in metal-organic chemical vapor deposition of tantalum oxide thin films, 324
Stress
stresses in strained GeSi stripes and quantum structures: calculation using the finite element method and determination using micro-Raman and other measurements, 218
in situ tensile strength measurement and Weibull analysis of thick film and thin film micromachined polysilicon structures, 247
study of nitrogen pressure effect on the laser-deposited amorphous carbon films, 318
Structural properties
investigations on polycrystalline $CuGaTe_2$ thin films, 14
reactive thermal deposition of indium oxide and tin-doped indium oxide thin films on InP substrates, 50
improvement of the crystallinity of CdTe epitaxial film grown on Si substrates by molecular beam epitaxy using the two-step growth method, 232
Sulphides
properties of WS_2 thin films obtained by solid-state reaction, induced by annealing, between W and S constituents sequentially deposited in thin film form. Influence of the annealing time., 69
Superconductivity
on the enlargement of the lattice parameter *c* in sputter deposited in situ prepared thin films of $YBa_2Cu_3O_x$, 277
Superlattices
quantitative analysis of electron microscopic micrographs of multilayers, 118
Surface and interface states
kinetics of lysozyme adsorption at the air–buffer interface, 169

Surface characterisation
atomic force microscopy study of diamond-like atomic-scale composite films, 173
Surface composition
investigation of the stoichiometry of MBE-grown Fe_3O_4 layers by magneto-optical Kerr spectroscopy, 270
Surface morphology
atomic force microscopy study of diamond-like atomic-scale composite films, 173
Surface roughness
reactive thermal deposition of indium oxide and tin-doped indium oxide thin films on InP substrates, 50

Tantalum oxide
experimental and theoretical study of step coverage in metal-organic chemical vapor deposition of tantalum oxide thin films, 324
Thermal desorption
reactive thermal deposition of indium oxide and tin-doped indium oxide thin films on InP substrates, 50
Thermionic emission
thermionic emission obtained by thermal annealing in vertical polysilicon–monosilicon junctions, 260
Tin oxide
morphology and physical properties of SnO_2-based thin films deposited by the pyrosol process from dibutyltindiacetate, 145
SnO_2 thin films prepared by the sol–gel process, 299
Titanium dioxide
photoelectrocatalytic hydrogen production from water on transparent thin film titania of different crystal structures and quantum efficiency characteristics, 130
Titanium nitride
a comparative study on the properties of TiN films prepared by chemical vapor deposition enhanced by r.f. plasma and by electron cyclotron resonance plasma, 124
Transmission electron microscope
quantitative analysis of electron microscopic micrographs of multilayers, 118
Transmission electron microscopy
properties of WS_2 thin films obtained by solid-state reaction, induced by annealing, between W and S constituents sequentially deposited in thin film form. Influence of the annealing time., 69
transmission electron microscopy of Al–Cu interconnects during in-situ electromigration testing, 103
high-resolution transmission electron microscopy study of pulsed laser beam crystallized Si thin film: the formation of hexagonal Si and defects, 313

X-ray diffraction
highly perfect thin films of SiC: X-ray double crystal diffractometry and X-ray double crystal topographic study, 1
fabrication of crystalline thin dye films using an ionized-cluster-beam deposition method, 40
microstructure of Co–Ni/Au multilayers studied by XRD, 61
X-rays
grain sizes of Ni films measured by STM and X-ray methods, 184

Young's modulus
determination of Young's modulus by a resonant technique applied to two dynamically ion mixed thin films, 55
Yttrium
numerical simulation of scattering of the molecules of yttrium tris(dipivaloymethane) ($Y(C_{11}H_{19}O_2)_3$) in the potential field of crystal MgO and the formation of a near-surface layer, 43

Zinc ions
incorporation and mobility of zinc ions in anodic alumina films, 150
Zinc oxide
an integrated optical method for measuring the thickness and refractive index of birefringent thin films, 255
Zirconium oxide
zirconia coatings realized by microwave plasma-enhanced chemical vapor deposition, 241
